

TRAY MANAGEMENT SYSTEM

TMS – Tray Management System

Tray Management Systems are comprised of several sub-systems and equipment designed to convey, sort, stage, and deliver tray mail throughout a United States Postal facility. The following is a list of equipment involved in this program: 21' Vertical Lift units, 21' Staging Towers, miles of 17" Wide roller conveyor, Tilt tray sorters, Difuku Staging units, Belt conveyor, Platforms, and Scanning equipment. TSC installed this complete type of system in five locations throughout the U.S. with a combined contract value of over 1.5 million dollars
